EXP:11.b ROUTING INFORMATION PROTOCOL

17-09-16

AIM:-

To stimulate RIP(Routing Information Protocol) using Cisco Packet Tracer and observe packet dynamic routing b/w different networks.

PROCEDURE:-

1. Open Cisco Packet Tracer.
2. Place three routers and two PC's.
3. Connect three routers in a triangular.
4. Connect PC0 to router0 and topology PC1 to router2.
5. Configure the IP address for all router interfaces and PC enable
6. Configure RIP on each router using router rip.
7. Advertise the directly connected network using network command.
8. Verify the routing table and test the connectivity using ping.

RESULT:-

The RIP was successfully stimulated using Cisco packet tracer and dynamic router selection and automatic routing were verified.
