EXP-4: LOCAL AREAS NETWORK.
30-07-2016.

AIM:-

Setup and configure a LAN using a switch and ethernet cables in your lab.

STEPS:-

1. Convert 3-4 host machines to a switch.
2. Assign IP address to each host machine.
3. Check the connectivity between the machines by using "ping" command.
4. Share and access the files and folders across the machines of the LAN.

RESULT:-

Thus setup and configuation of LAN using switch and ethernet cables in lab is completed.
